

# OUR MEDICAL TEAM IS YOUR MEDICAL TEAM

An integrated solution for ongoing COVID-19 risk mitigation in your workplace

The COVID-19 pandemic has fundamentally and permanently changed our healthcare system. Employers have been forced to quickly become experts in clinical decision making – with little to no clinical knowledge or guidance. Not only that, but the ground is shifting on a daily basis, with new guidance, new testing, and conflicting information. Employers need a trusted clinical partner.

## VIRTUAL CHIEF MEDICAL OFFICER

You'll get a physician leader from R-Health's COVID-19 Physician Taskforce to assume the role of **Virtual Chief Medical Officer** for your organization.

- Evaluate clinical efficacy of the constantly evolving workplace social distancing guidelines, available virus and antibody testing, and clearance to work options.
- Work closely with your leadership team to develop, implement and monitor a customized and effective Return to Work plan based on your unique workforce, industry and geographic location.
- Assess clinical effectiveness of potential and requested workplace accommodations.

## COVID-19 CLINICAL SERVICES

R-Health's clinical team will implement your needed COVID-19 clinical services.

- Daily symptom monitoring & reporting for all employees via our proprietary **HealthTrackR** platform.
- **COVID CaRe** - Unlimited virtual access to a personal R-Health primary care provider for employees with COVID-19 symptoms to assess severity, determine proper clinical course, and provide return to work clearance after symptoms have resolved.
- Clinical protocols for managing COVID-19 outbreaks and presumptive positives in the workplace.
- Antibody testing and vaccinations (once clinically reliable options are available).

## ADVANCED PRIMARY CARE

R-Health is a leader in Advanced Primary Care solutions, with years of experience providing transformative primary care to leading employers.

- **Virtual+ Primary Care** delivers an expanded scope of virtual primary care services.
- Ensure employees and their covered family members can continue to access essential preventive and chronic care, as well as mental health services.
- Care delivered by the same personal primary care provider every time to ensure continuity of care.
- Option for unlimited in-person visits with your personal primary care provider in a safe, private medical practice environment for vital care that cannot be delivered virtually.

## THE WORLD HAS CHANGED. YOUR PRIMARY CARE MUST TOO.

Luckily, R-Health has been forging a new path forward with Advanced Primary Care for years and has proven this is the right solution for leading employers. During the COVID-19 pandemic, our partners have entrusted us with the care of their teams and with helping them develop new guidelines, policies and procedures for COVID-19 planning. R-Health's Advanced Primary Care solutions can be tailored to your unique needs, in both the short and long term.
